**Features and Product Benefits**

- Holder for the world's first finger-safe power fuse system.
- Holder and CUBEFuse together deliver Class CF and Class J fuse performance in a time-delay or fast-acting version. See Data Sheet 9000 for time-delay indicating and non-indicating CUBEFuse performance characteristics. See data sheet 2147 for fast-acting CUBEFuse performance characteristics.
- Smallest fuse and holder footprint of any class fuse installation including Class J, CC, T and RK.
- DIN Rail or panel mount for easy installation.
- Holders dovetail together to easily achieve the required number of poles.
- All holders (TCFH30N, TCFH60N and TCFH100N) dovetail together to permit mixing ampacities.
- All holders accept equal and lower amp rated TCF\_ indicating and TCF\_RN non-indicating time-delay CUBEFuse or FCF\_RN fast-acting CUBEFuse - no need for a fuse reducer.
- Dual wire rated terminals for wiring ease.
- High 300kA withstand rating stands up to high fault currents.
